

Can Simoneta

Fish&Pips

LOCATION:

Mallorca, Spain

Perched on a cliff top looking towards Menorca, Can Simoneta is an intimate retreat, where all who stay would prefer to keep it secret. Part of its magic is its setting – expansive grounds and carefully tended gardens and olives, with just the sound of the breeze and the waves. The rest is the friendly welcome, the service, and the flavours of the Mediterranean captured in the elaborate skill of the head chef. With only 26 rooms and suites, choose from the light and airy colonial style main house with its collection of contemporary art, or the recently renovated beach house, where the beds have a view of the sea and its own pool built into the rock. This 5* hotel is the ultimate luxury and the perfect romantic hideaway. The most difficult choice you'll need to make all day is whether to go for a swim or swing in a hammock in the pines. **We love this hotel** for its pristine landscaping, stunning architecture and sophisticated feel.

About Mallorca:

Mallorca is an island that reveals more of itself each time you visit. The warm, dry climate makes it a destination to visit earlier and later than many others in the Mediterranean, and its rich cultural past has left no end of places to explore. Our Mallorca portfolio is easily accessible by plane, and gives you some of the very best of this island, whether you base yourself in just one, or stay for a couple nights in Palma and then head north and relax by the sea.
