

Can Mostatxins

Fish & Pips

LOCATION:

Alcudia, Mallorca

Tucked away within the ancient walls of Alcudia Old Town, close to the main square, Can Mostatxins has the style, character and atmosphere that we love. From its 15th century origins, where the watch tower served as the town's look-out, it's had many uses over the years - most recently a butcher's shop. The name mostatxins, meaning moustache in local dialect, comes from the butcher himself who had particularly renowned facial hair! After six years of meticulous renovation, with artisans recovering and restoring centuries of architectural detail and the later addition of Frare, a 18th century Modernist property next door, with its Juliet balconies and stained glass windows, it's now a little oasis of calm and tranquility. We love the mix of old and new and the striking pieces of art dotted around. Not only is the past respected here, but the future too. A big plus for us the hotel's commitment to sustainability, with no single use plastics, osmosis water dispensers, solar power and all produce from local suppliers, giving it a zero carbon footprint. The attention to detail, the atmospheric location and most of all, the team's innate ability to make you feel right at home the minute you walk through the door, have fast gained Can Mostatxins an enviable reputation. **We love this hotel** because it is a little oasis of calm in the beautiful historic old town of Alcúdia, making it the ideal spot to go and explore the north of the island.

*"A little haven of peace and tranquillity
in the heart of Old Town Alcudia"*

About Mallorca:

Mallorca is an island that reveals more of itself each time you visit. The warm, dry climate makes it a destination to visit earlier and later than many others in the Mediterranean, and its rich cultural past has left no end of places to explore. Our Mallorca portfolio is easily accessible by plane, and gives you some of the very best of this island, whether you base yourself in just one, or stay for a couple nights in Palma and then head north and relax by the sea.

Can Mostatxins
